audited consequences of every setting
sent to measurement per 1000
missed soluble per 1000 (audit)
false leads per 1000
A
B
scenario 1: assays ≤ 450
confirmed ≥ 60, missed ≤ 90
in-class request α_1
out-class request α_0
scenario 2: assays ≤ 250
confirmed ≥ 60, missed ≤ 90
in-class request α_1
out-class request α_0
expected false leads per 1000
assay limit
yield limit
miss limit
feasible
fewest false leads
